

Acknowledgements

I am indebted to my supervisor, Rudi Lutz, without whose help in times of crisis this thesis would never have been completed, and for his consistently good advice.

I am also thankful to the other members of my thesis committee, which included, at various times, Theo Avrantis, Yvonne Rogers, Sharon Wood, Mike Sharples, and Steve Easterbrook.

My especial thanks go to my colleagues and friends at the Department of Computer Science and A.I. at the University of Malta, who shared my lecturing and supervision loads to create time for me. I owe you guys big time! I also owe thanks to people at the Computer Services Centre of the University of Malta, especially to Robert Sultana, and to my sponsors, the University of Malta.

Finally, I owe immeasurable thanks to Brenda, my mother, Jo, my brother, Tim, and Yasmeen, for their love, support, patience and understanding.
